Don't Miss the 3 One-Act Plays Tomorrow Night

An Evening of Laughs and Thrills Assured

Everything points to a real entertaining evening at the Little Theatre tomorrow (Friday) evening when the local association will put on three One Act plays.

A good Comedy, "Indian Summer" a side-splitting farce "Love in a French Kitchen" a thrilling drama "Last Post" are the selections for the evening. The latter was written by Mr. King and should have a special appeal for returned men as well as proving most interesting to others.

Since this is the last program for this season it is hoped there will be a crowded house this is a community venture and the Association is anxious to have sufficient funds to enter the provincial festival next season.

Arrangements have also been made with the High School 30 piece orchestra, under the direction of June Maillard, to furnish the music during the evening. This orchestra is well worth seeing and hearing.

Get your tickets and don't be disappointed at the last minute like so many were at the high school concert.

Pleasing Concert by Mr. Bullen's Pupils

La Gordon Memorial School

The entertainment put on in Gordon Memorial School room last Monday evening by local pupils of Mr. Bullen's singing class, assisted by talent from Medicine Hat was fairly well attended and all present thoroughly enjoyed the program.

The younger pupils certainly showed the good results of their training and the assistance by their older experienced singers was also rendered in their usual pleasing style.

Bisons plays in Medicine Hat on Friday and Saturday of next week in the finals for the Morgan cup.

* * *

Canada was easily first among the exporters of oats to the British Isles in 1934, with 1,941,279 cwts. This was considerably more than half the amount imported into Britain from all sources.

* * *

Considerable milk was distributed free by R. Pedersen's milk wagon last Sunday. For team took fright from a hauling one and started off without the driver. They ran several blocks leaving a quart or so at every crossing. The wagon was damaged considerably but not beond repair.

* * *

Word was received here Monday announcing the death of Beverly Joan Horne, 3 year old daughter of Mr. and Mrs. Jay Horne of Los Angeles, formerly of Redcliff and grand daughter of Mrs. M. Cleary, of this town. The child was taken to the hospital on March 10 and passed away on the 16th.

Former Redcliff Lady is Called BY Death

Mrs. F. Wilde Succumbs to Heart Attack

Word has been received of the sudden death of Mrs. Wilde at Lethbridge Albert on March the 10th. Mrs. Wilde as returning to Red Deer after visiting friends in Cranbrook, when she was seized with a heart attack and taken to the hospital at Lethbridge where the end came almost immediately.

The deceased lady, who was born at Titaboutie Coull Aberdeen Scotland, in 1865, came to Canada in 1889 and has resided here ever since, spending several years in Redcliff and district.

She is survived by one daughter Mrs. Roy Auger, of Toronto and one son, William J. Wilde of Red Deer.

Her husband predeceased her some years ago.

The late Mrs. John Ellis of Redcliff and the late Mrs. M. M. Walker of Box Springs district were sisters of Mrs. Wilde.

Aberhart Warns Unscrupulous Ones

They are His Greatest Fear Today, He Said

In the Review a few weeks ago reference was made to the possibility of over zelousness unfairness and dishonesty on the part of members of any organization, working to the detriment of that organization no matter, how good the cause. In his radio talk last Sunday Mr. Aberhart issued a note of Warning along the same lines, when he said: "Soon supporters of Social Credit would be called upon to select honest men to represent them in the legislature. How could they do this if they themselves were not honest. "This was his greatest fear today," he declared.

Mr. Aberhart also warned his supporters against taking former supporters of old political parties into their groups. This sounds kind of strange coming out of the Social Credit lead in this part of Alberta were among the leaders of all three old political parties before Social Credit came to light.

Jackie Coogan is Now Verile Hero

Grown into a tall broad and handsome young man, Jackie Coogan of "The Kid" fame, returns to the screen for his first adult role in Paramount's "Home on the Range," which comes Monday to the Monarch Theatre.

And fully accustomed with Stetson hat, high heeled boots and six shooters, Jackie Coogan proves as hard riding and straight shooting a western star as Randolph Scott, Addison Richard's, Fuzzy Knight or any of the other three hundred famous cowpunchers who appear in the film.

With Evelyn Brent and Ann Sheridan providing the feminine interest, "Home on the Range" is the story of a deadly feud between a gang of crooks and the rancher brothers, played by Jack Coogan and Randolph Scott.

This Week at Ottawa

Ottawa, March 16th. 1935

Judging by the tone as well as by the words of the speakers it was made clear that there is a sharp difference of opinion between the leaders of the C.C.F. and his followers. Mr. Woodsworth was urging that laws be passed for a six hour day for farmers. It was quite clear that some of his associates were getting more and more restless as the debate dragged on and finally Miss McPhail rose and descended on the whole proposal with the most contemptuous vigor, She was very scornful of the idea of 2 or 3 shifts upon the farm as it would greatly increase farm costs. She might have pointed out that the farmers wife would also need much extra help if the officers of the law were obliged to watch and punish, by fine or imprisonment, any person who worked more than 6 hours at farm work.

I think it is clear that farmers work harder than others and they are also burdened by high tariffs high cast of everything they buy and low prices for their products. They can not go to Movies on account of not being able to run their cars and are unable to pay for dental or medical care or provide their homes with the ordinary comforts and reading material. The Reform Programme provides for help to certain farmers who have gilt edged security to offer but all the other measures e.g. Unemployment Insurance, Minimum Wages, Short Working Hours and Weekly Day of Rest will increase the farmers burden. They are not objecting to this very much but a labor dividend given to all persons who reach a certain age would be a positive and more direct aid, more universal in its application and more effectively removing old er people from the labor market to a contented retirement.

Any one who has lived on a farm looks with some envy even on what a person in the city gets for relief. A family of five an relief gets:

in Westmount Que.	$46.25
in Oshawa, Ont.	45.46
in Ritchener, Ont.	49.20
in Brandon, Man.	47.00
in Calgary, Alta.	53.70
in Toronto, Ont.	54 00
in Winnipeg, Man.	50.90
in Edmonton Alta.	53.70
in Regina, Sask.	47.50

The Railway officials and and the officers of the Brotherhoods are here to press their views on the application of the eight hour day. Those who are best organized are in the best position to do this but it is the duty of the members to press the claims also of those who are not able to send special delegates.

The plan decided upon seems to be a compromise and meets with approval generally. Where there is a working agreement between Employers and Employees, it will continue provided it contains the basic principal of the eight hour day and does not exceed the 48 hour week.

Members from Railway centers are watching this legislation closely and the government is finding that there are many ramifications that they had not bought of.

Some Industries who have had the 44 hour week are now making advantage of this law to work 48 hours as provided. Another change in the Bill allows the Cabinet to decide what industry may come under the Act.

Mr. Bennett has expressed the wish, it is rumoured, to have the House in Session until July 1st can come in to put through some further legislation. It, therefore, seems that there will be more or less marking time until he removes [illegible]

Yours truly

F. W. Gershaw.

Mr. A. B. Cow, one of the first lawyers to locate in Redcliff, and one of the first of our citizens to enlist in the Great War, who died in Medicine Hat last Tuesday at the age of 54 years.

The funeral takes place from the Masonic Hall Medicine Hat on Friday afternoon, March 22nd, at 2:30.

Lesk's Furnitare Store In New Quarters

Will Now Be Known As The Capital Building

Mr. Lesk, who has been conducting a furniture store in Medicine Hat for a number of years past, has purchased the building on third street previously known as the Twaits Block. The building has been undergoing repairs for the past month and is now occupied by Mr. Lesk, who has one of the finest and most modernly equipped buildings in the city for the display of his immense stock of all lines of furniture and other household goods.

Under the ground floor store is a full sized bacement which has been fitted up in most elaborate style and the oxwelle lighting system makes it an ideal show room.

On the second floor is a large hall suitable for all kinds of meeting, dances, etc. as well as 3 suites of rooms for light housekeeping.

In future this building will be known as the "Capital Block" and the hall as the Capital Hall.

Mr. Lesk is now settled in his new building and is better prepared than ever to carry on in this line

Advocates Slashing Of All Private Debts

W.C. Smith U.F.A. for Express On Budget Debate

Immediate reduction by as much as 50 per cent of all private debts as a means to economic rehabilitation, was urged in the legislature on Thursday by W. C. Smith, U. F. A. Empress, in taking part in the debate on the budget. He also advocated institution of some scheme of crop insurance as a means of protecting the farmer.

"There must be straight cancellation of private debts. That must be done at the present time, to apply to both urban and rural debtors," asserted Mr. Smith.

He delivered an assault on the Farm Loan Board and also labled out at the government tax on gasoline as applied to farm trucks.

"There is no reason" he declared, "why a farm truck should have to pay an extra tax for carrying farm products when wagons conveying the same goods are not so taxed."

He also voiced his strong opposition to any move sent to abolish the refund for gasoline used in farm work.

Mr. Smith also urged that rentals and taxes should be reduced to a minimum on leased and freehold lands, while railroad rates should be lowered to permit moving of feed for finishing cattle, or of moving cattle to feeding areas.

FOOTBALLERS, ATTENTION!

Would those who have any football strips and football boots of any description please hand them to Ted Fairhurst, 3rd street, Redcliff. Your cooperation will be appreciated.

Respectfully yours
W. P. Willis
Secretary Treasurer

Mr. C. Ambury, of Calgary has purchased the bakery business here previously conducted by Mr. O. Ruud, and took possession last Monday. Mr. Ambury has had a wide experience in all branches of the bakery business and will run an up-to-date shop.

Germany Has Again Stirred up World Capitals

Hitler's Recent Edict Worries European Nations

Developments in Europe during the past week have created a restlessness throughout the world and there is great speculation as to just what the outcome will be.

Hitler's sudden edict announcing mandatory military service in Germany, which means Germany's utter disregard for the Versailles treaty, has caused war rumbellings in the capitals of all leading countries.

London March 18th— While the house of commons seethed with interest in Reichsfuehrer Hitler's announcement of mandatory military service in Germany, Douglas Hacking, financial secretary of the war office opened the debate on increased estimates for the British army with the statement:

"In view of yesterday's news we are faced with at least one extra commitment the provision and organization of adequate coastal and anti-aircraft defence for the home country.

Russian Military officials warned the Red Army that war "May break out unexpectedly" and called upon the Soviet armed forces to be prepared.

Washington discribes the German armament situation as "Threatening" and "Very Serious."

Paris papers appear to think there is no alternative but for Britain Italy and France to force Germany to come to terms.

Rome press says the treaty of Versailles is now "Not worth but a useless shadow."

"Broadway Bill" is Capra's Greatest Film

"Broadway Bill," declared to be Frank Capra's greatest picture, surpassing even "It Happened One Night" and "Lady for a Day" comes to the Monarch Theatre Wednesday Mar. 27th. The stars are Warner Baxter and Myrna Loy.

Based upon Mirk Hellinger's magazine story, "Broadway Bill" presents the romance of a man and a girl, both imbued with the love of horses and a roving nature. Drama, patos and humor are said to be blended in the screen play with the deft Capra touch. The story according to reports, offers Warner Baxter his greatest role since "In Old Arizona" and presents Myrna Loy as a new and interesting personality. In the supporting cast are Walter Connily, Helen Vinson, Lane Overman, Raymond Walburn, Clarence Muse, Margaret Hamilton and many others.

It appears that all points between the C. P. R. and the waters of the Eastern Irigation block west of here, have now been settled and that much more liberal terms have been given to the settlers. The proposition of taking over the district from the C. P. R. and now awaits onl the approval of the legislature.

What Are Actual Needs?

Listening to a discussion the other day on quotas and schedules adopted by governmental authorities as a guidance to those entrusted with the heavy and extremely difficult task of dealing with the cases of people who at this time are compelled to look to governments for the bare necessities of life, the question was forced upon our attention: What do we actually need?

There are an enormous and varied number of things we want, and our wants differ as greatly as our individualities differ, but when it comes down to a definite listing of the things we actually need not only to sustain life, but to make life really worth living, the number and variety of such needs is comparatively small.

People to-day list as needs scores of things which less than a generation ago were not even in existence, or so little known and in use as to be regarded as very great luxuries. For example, unemployed people living in our cities and, through no fault of their own compelled to accept municipal and government help, look upon the provision of electric light as an absolute necessity, and would consider it a great hardship if they were asked to resort to candles, or even the old kerosene lamp, as a means of illumination. Yet their parents got along very well with kerosene lamps and their grandparents and great-grandparents did not feel they suffered any great hardship because they had nothing but candlelight. And throughout the length and breadth of rural western Canada to-day hundreds of thousands of people get along very well with kerosene lamps. But in our cities people now list electric light as an absolute need.

Casting our memories back to boyhood days, thirty, forty, fifty years ago, we recall that our clothing and food requirements, our actual needs, were small and inexpensive compared with what we list as needs now. As a matter of fact, many of our so-called present day needs are not needs at all, and if our environment was shifted, we would not regard them as needs. Hundreds of people go camping every year, leave what we term "civilization" and go off into the wilds, and put up with conditions of living, and go without scores of things,—and enjoy doing so,—which at home they insist upon having as actual needs.

Life, and real living, does not consist in the abundance and variety of the material things we may possess. The pioneer lacked most of the things now listed as absolute necessities, yet they enjoyed good health, were happy, and found life well worth the living. They built homes, reared families of sturdy children, saw beauty in their surroundings, and developed character. Their needs were few and inexpensive. And they built nations.

These years of depression are developing two types of people. Out of one group men and women are emerging with stronger, finer characters. They are more self-reliant, with hampering superficialities burned away like so much dross, with the result that with the passing of the depression they will be the strong men and women who will take the leadership in this world, and who, out of the experiences of these years, will profit throughout the years to come. The other group consist of those who have been content to drift with the tide, to regard themselves as the sole victims of circumstance, ready to sit with folded hands and let others not merely provide them with actual needs, but who demand that these others shall further burden themselves in order that they may be supplied with things they want over and above their needs. With the passing of the depression, members of this second group will find themselves unequipped and incapable of making that provision for themselves which they will then be called upon to make.

People in this second group are ruining their own lives and jeopardizing their whole future. Before it is everlastingly too late they should take stock of themselves. The State must and will provide all people with actual needs of subsistence, including shelter, food and clothing when because of the vagaries of nature, or the inability to secure employment, these people cannot supply their own needs. But desires and wants must not be confused with needs. And the fact that the day is coming when all people will have to make provision for their own needs, as well as to gratify their desires and wants, should not be lost sight of.

It would be well, therefore, for all people to give serious consideration to what are needs and govern their demands upon their fellow citizens, as represented by the State, accordingly.

Heated Railway Car

New Type Is Developed For Transportation Of Fruit And Vegetables

Canadian National and Canadian Pacific Railways are developing a new type heated car for transportation of fruit and vegetables, the Canadian horticultural council was told in the report of its transportation committee.

The council instructed its transportation committee to draft a resolution which would ask a portion of any federal monies voted for building of new rolling stock by the railways be used to increase the number of fruit and vegetable carriers.

Col. R. L. Wheeler, Dominion fruit commissioner, described experiments by the railways to develop a new type heated car. The model he described was charcoal heated, with a system of hot-water pipes similar to a domestic heating plant. The council had asked the railways to consider a gas-burner heater, with inside temperatures regulated by the degree of cold outside the car.

Seek Oil Independence

Germany Hoping Domestic Requirements Will Soon Be Met

Amazing was the resistance offered by the Germans during the war largely because of her scientists, and now the German people are seeking through scientific means to make their country as economically independent as possible. They are increasing their efforts to find substitutes for imports. Not the least of these is petroleum, or the mineral oil from which it is produced. It is now asserted by German scientists that within a few years Germany will be independent of mineral oil imports. Petroleum is being produced synthetically from coal, and success is attending efforts to utilize brown coal—lignite—so extensively found in Germany. In the last year Germany has produced a third of the petroleum needed and she hopes that by 1936 her total domestic requirements will be met.

The Finnish statistical office reports that in the 13 main towns and cities of the republic 19,271 married women are engaged in remunerative activity; this is 18.9 per cent. of all married women there.

Glasgow, Scotland, and the Isle of Man are to be connected by an air service.

BIG BEN

THE PERFECT

Chewing Tobacco

Proves That Earth Wobbles

Stars Once Seen Now Do Not Rise Above Horizon

When the astronomers of ancient Greece grouped the stars and found names for them they listed constellations that can now longer be seen from Greece. In this way they supplied Sir James Jeans, the British astronomer, with a proof of a scientific fact discovered long years after they departed this terrestrial planet. Among the constellations named by the men of Greece 2,500 years ago are some which, although visible then, cannot be seen in Greece to-day because they never rise above the horizon. The wobble, as it is called, is a movement of the spinning earth in which its axis makes a small circle once in every 26,000 years; in other words, each pole describes a circular path in the heavens at the speed of about a foot a year. This slow movement is caused by the pull of the sun and moon on the bulging equatorial part our globe.

A Speedy Camera

Photographing simultaneously moving machinery and a clock dial, a camera recently invented in Europe takes up to 3,500 pictures a second and detects errors.

FALSE

DR. WERNET'S POWDER

TEETH

Grips plates so firmly and snugly they can't slip—you never know you have false teeth. Dr. Wernet's Powder is pleasant and never causes soreness—it is the world's largest seller—prescribed by leading dentists—costs but little but blissful comfort is yours all day long.

Seven Miles Of Wool

Used In Scarf Weighing Only Two And Half Ounces

A London newspaper says: "With shame and sorrow this column has to admit that it rather shirked dealing with the question of the royal wedding presents at the time of the wedding of Princess Marina and the Duke of Kent. It seemed such a vast task, and photographs of the presents while they were on display gave a much better impression. But now, although so late in the day, it seems a pity not to tell of one present the Duchess of Kent received. It came from the Shetland Islands, and was a self-made gift from the islanders themselves. It was a scarf knitted by Mrs. Thomas Sutherland, who is 80 years old, and contained seven miles of wool thread weighing only two and a half ounces! That, we maintain, is fine wool. It was plucked by hand from the necks of lambs and spun by the 83-year-old sister of the knitter."

Strange Happening

Radio Music Is Heard From The Spout Of A Kettle

Steam comes out of the spout of Miss Ruth Lightbourn's kettle at Oakville, Ont., but the utensil is also capable of producing other things. During a heavy fog, fine orchestra music came from the water container as it sat on the stove. The program, which was audible eight feet away, lasted 20 minutes, then faded. During a lighter fog the performance was repeated, but the music was fainter.

There is no radio in the house and the stove is in no way connected with a ground or aerial system. Miss Lightbourn is at a loss to explain the strange occurrences.

HEADACHE, BACKACHE?

Mrs. J. W. Hesgan, 6 Labatt Ave., Toronto, Ont., says: "I had headaches, pains in my back, had no appetite, and would feel dizzy and faint. I was so weak I could hardly keep up. I took Dr. Pierce's Favorite Prescription and it seemed to give me new life."

New size, tablets 45 cts., liquid $1.20. Write Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

Signs All Can Read

Pictorial signs—a telegraph post for the telegraph office, a trunk for the baggage office, and a big question-mark for inquiries—are in use at Parkeston Quay, Harwich. All the symbols selected are known the world over, and foreign visitors of all nationalities can "read" them.

Meat packers report that more meat was consumed in the United States in 1934 than ever before in history.

A plant in Norway produces rust-free and acid-resisting steel, having an annual capacity of between 40,000 and 50,000 metric tons.

I'll TELL YOU HOW TO ROAST MEAT BETTER

—and no pan-scraping afterwards

Line your roasting pan with Canapar Cookery Parchment. The fats and juices won't burn. The meat is more succulent—and you save yourself all the bother of scraping or scouring the pan afterwards.

You can cook three vegetables *at once* in the same pot—when you place each in a bag of Canapar. No odors escape. All the goodness is sealed in. Use only ONE burner and turn that down low. *Save fuel!* Boiled or steamed fish is better, and less work, cooked in Canapar.

Just rinse the sheet of Canapar and use it over and over again. It won't absorb odors. Many women use it for a dish cloth. It's just like silk when wet—is very tough and does not shed lint.

An Unconquerable Race

No Nation Apparently Can Do Anything With China

"Japan has served another ultimatum on China or what amounts to that. What, in the long run, can she do to China?

"Nobody can do anything to China. It is like beating a feather bed with a club. There is no resistance but no finality. It is like cutting water with a sword," declares Henry Carr in the Los Angeles Times.

"The soil of China is fertilized with the blood and bones of conquerors. They came in with swords and battleaxes. They kill and slaughter, lay cities in waste . . . and then old China closes over them.

"In a few generations the conquerors learn to speak Chinese and have forgotten from what country they came.

"The military problem of conquering China is impossible because there is no solar plexus—no nerve centre.

"The Chinese are indifferent to national patriotism as we understand the word. Nations which have invaded China have had the slightest difficulty in hiring Chinese at day's wages to help conquer their own country.

"The Chinese regard government and flags as man-made devices that are here to-day and gone to-morrow and, generally speaking, are not worth fighting about. But the Chinese have a race consciousness and a tenure of life that has survived every invasion; has shaken off the effects of every revolution, every revolt as a dog scratches off fleas.

"Japan took Manchuria in order to avoid the war perils that threatened the life of England during the World War. This was the peril of being blockaded and starved.

"Manchuria forever removes this peril. But in taking Manchuria Japan found herself between two jaws—between Russia and China. Were she to get into a foreign war, these jaws would certainly close. That is the real motive of Japan's present excitement and her ultimatum to China. It is necessary for her to push back the jaws.

"Russia has no intention of fighting Japan if she can help it. She is playing a waiting game—pushing stealthily down through Mongolia to establish contact with the Chinese. She knows that Japan can't keep on supporting a great army in the field indefinitely without going broke.

"The same is true with China. China retreats from any actual conflict but compels Japan to keep large and expensive armies in the field. In the end, she knows that Japan will crack up financially under the strain.

"I asked a famous American diplomat to tell me what he saw in Manchuria fifty years hence.

"'That,' he said is easy. You will find a lot of peaceful Chinese farmers tilling the land. If you ask them what became of the Japanese they will lean on their hoes, scratch their heads and ask, 'What did you say the name of the people was?'"

Science To The Rescue

Will Determine Whether Seals Menace Salmon Schools During Migration

Canada's learned men of science are planning to delve deep into the mysteries of a seal's stomach next summer to find out if they are eating Pacific coast fishermen out of a living.

Research workers attached to the Dominion department of fisheries will inspect the stomachs of hundreds of seals captured off the coast of British Columbia in May and June next in an effort to establish whether the rapidly increasing seal herd make forays into sock-eye salmon schools during their annual migration from southern waters off the coast of California to Arctic waters. The British Columbia Biological board and the department of Indian affairs will also aid in the test.

New Mechanical Man

One of the newest of mechanical men is a doctor's assistant. It tells your height, weight and pulse count—all for a penny. The device was exhibited when the National Association of Coin-operated Machine Manufacturers met recently in Chicago.

Shipments of livestock from Western to Eastern Canada during 1934 included 148,623 cattle; 7,715 calves; 200,456 hogs, and 74,471 sheep. Compared with 1933, the increases were 28,384 cattle; 3,556 calves, and 19,209 sheep. There was a decrease of 26,847 in the number of hogs shipped.

There is a fortune awaiting the inventive chap who can squeeze a full length mirror into a compact.

KING GHAZI INAUGURATES 600-MILE OIL PIPE LINE

King Ghazi of Iraq recently inaugurated the Iraq pipe-line at Kirmik, one of the most gigantic engineering undertakings ever attempted, by turning a handle to start the oil trickling on its 600-mile journey across the desert to the Mediterranean. It was constructed at the enormous cost of $50,000,000 by the International concern comprising British, French, Dutch and American interests. Here we see King Ghazi inspecting the gate plant while the British Ambassador walks behind him along the other dignitaries.

Gave Unusual Reasons

Montana Students Tell Why They Are Attending College

"Why are you going to college?" an inquiring reporter for a university of Montana student publication asked of everyone he met on the campus for several days.

The answers for the most part were as expected, such as "to have a good time; to obtain a cultural background; to train for a job, and to have something to do."

Among the more unusual replies were the following:

"I don't know. I haven't figured it out yet."

"To get even a pick and shovel job now, a fellow has to have a college degree."

"Because it seemed the only thing to do—and besides everybody else was going."

"I guess to get more or less of a cultural background."

"I feel that I am serving time, which seems to be necessary, until I reach an age at which people will take me seriously."

"For the broadening influence, personal satisfaction and contacts that a person makes."

"I just took it for granted that I would go—and found that I enjoyed it and thought that what little I got out of it is well worth the time and money."

Hard Fish To Hook

Rarely Angler Catches Herring In That Way

Not one sea angler in a hundred—perhaps not one in a thousand—has ever hooked a herring. From the trout to the tuna, from the salmon to the shark, almost every fish that swims can be taken with hook and line. The exceptions are very few, but they include the sardine, the pilchard and the American shad. The latter can be taken in salt water with bait, but when they come into fresh water to spawn it is practically impossible to tempt them. With salmon the case is reversed, for thousands of salmon are taken yearly in the rivers of the British Isles, but to take one on the hook in British seas is very rare. Off the mouth of the Costello, a west Irish river, they will sometimes rise to a fly, and there are one or two spots on the Scottish coast where the same thing happens.

Can Make No Exceptions

Royal Rule About Gifts Is Very Strictly Kept

It is a recognized rule of members of the British Royal Family to refuse gifts from anyone except relatives, personal friends or public bodies. In accordance with this custom packers have been busy at St. James Palace returning wedding presents to all quarters of the Empire and even from other lands, which were sent to the newly wedded Duke and Duchess of Kent. Among them was a hand-embroidered teacloth "sent by an aged woman in Canada" but even for so touching a gift it was felt that there could be no exception and she will receive a polite message of regret along with the others.

Human beings are attacked by the "flying cockroaches" with which many vessels in the South Seas are infested.

France is trying to dispose of its great wine surplus.

Restoring Smallest Palace

Building Was Erected At Greenwich 300 Years Ago

Britain's smallest palace, at Greenwich, built by King James I. for his wife, Anne of Denmark, is to be restored to the same condition in which it was left by its architect, Inigo Jones, 300 years ago.

The palace was built in two parts with the river front on the one side and the park frontage on the other, the main road ran through the middle of he palace. As it stands today the building bridges the old Kent road in three places, at either end and in the middle.

The end bridges represent the courtyard type of architecture, which authorities believe was constructed by a more modern builder.

The palace, as restored, will be maintained as a national monument, and will house many treasures and rare exhibits of the National Maritime Museum.

Is Now A Curiosity

Letter Posted Twelve Years Ago Returned To Starling Point

A man at Berezno, a village near Rowne, Poland, has just received a letter which he himself posted twelve years ago. The letter was addressed to a Pole in Rio de Janeiro, Brazil. The Brazilian postal authorities could not find the man to whom the letter was addressed. But they had a good try—the letter was sent from place to place until the envelope was completely covered with stamps, date stamps and seals. The Rowne Post Office have asked to have the envelope sent back to them because they want to keep it as a curiosity.

Set Good Example

When the Bank of Nova Scotia officers, directors, and shareholders gathered at luncheon following the annual meeting in Halifax there was no program. Those arranging the luncheon dispensed with speakers, chairman, and other formalities. It was emphasized that the informal atmosphere afforded a better opportunity for those attending to make or renew acquaintanceships.

A bachelor is a man who was willing to take "no" for answer.

Question Is Answered

Women Give Reasons Why They Do Not Whistle

An eminent English doctor has been exhorting workers, irrespective of sex, to "sing, hum or whistle" to relieve the monotony of work, and has thereby started a controversy.

Why don't women whistle?

Is it because whistling is a masculine habit? Is it that superstition still checks the pretty pursing of rosebud lips? Said the old adage:

"A whistling woman and a crowing hen
Is fit for neither God nor men."

Finding it difficult of belief that Miss 1935 goes in fear of this frail convention, and suspecting that women in general don't whistle because they can't, one of the newspapers has run a plebiscite of its women readers.

The answers fall into three groups, neither of them flattering to men. Here they are:

First group—Women do whistle; they can do it as well as men.

Second group — Girls haven't enough puff. Besides, they laugh too easily to whistle.

Third group—Either you can whistle or you can't. Very few men can whistle really well.

Trans-Canada Air Mail

Rumor Has It That Service May Start This Spring

The fact that eight commercial pilots are now taking a course in flying at Camp Borden appears to have given rise to rumors that an early start in the trans-Canada air mail service is to be expected this spring. Officials of the national defence department stated that the courses for civil aviators at Camp Borden have been going on for several years and have no connection whatever with the trans-Canada air mail service. Action on this service depends entirely upon a vote of money by parliament. So far, the government has not set up such a vote.

"You are always asking for money. What shall you do when I am dead? You will have to beg for it, then."

"Well, I shall be better off than the women who have had no practice."

◆ FANCIFUL FABLES ◆

Reducing The Danger

Dry Ice May Replace Nitroglycerine For Shooting Oil Wells

"Shooting" is the last stage in the completion of an oil well. If there is an accumulation of debris in the half-mile-deep hole, if the oil doesn't penetrate the sand—which often isn't sand at all, but rock—or if the well suddenly ceases its first free flow, then the nitroglycerine man is called in.

The long, thin tubes that look like overgrown tomato cans are filled with the explosive, as much as the expert deems necessary. They are carefully lowered into the well to the desired depth and then detonated with another especially prepared shell that is dropped on top of the whole shot.

Anywhere from 10 to 500 quarts may be fired at a single shooting, depending on the work to be done. Then down in the depths of the earth great fissures appear. Sand and rock are loosened. Some is thrown out, some crushed and burned in the blast. The oil flows into the hole and, quite often, over the top of the derrick. In that case the well is a gusher.

But it isn't as simple as it sounds. Nitroglycerine is tricky stuff. Just when it appears most quiet and innocuous it seems to be plotting fresh devilry. Consequently, few shooters die in bed.

The risk isn't all to the shooter, either. Sometimes the fire of the blast belches back to the surface and sets ablaze the gas and oil it brings. Then men must work night and day, and maybe even die, to subdue the flames that are fed from the almost inexhaustible supply of fuel from deep in the ground.

In Pennsylvania the coal companies have found marked success in shooting mines with dry ice.

Now, dry ice may look perfectly harmless when packed about your ice cream. But in the smoking, intensely cold crystals there is packed all the power of the atom. Dry ice is the name by which solidified carbon dioxide is commercially known. It's the gas that your plants breathe to give them life. It's the power that raises your breakfast biscuits and puts the "soda" into soda water.

Peru Becoming Prosperous

Oil Brings New Wealth To Country Of The Incas

The ancient country of the Incas, Peru, is showing a steady rise in economic conditions, the improvement having set in almost two years ago and has been continuous. There is one product which, apparently, the Incas knew very little, if anything, about, that is helping to maintain Peru's trend upward and that is petroleum, the "black gold" of the Twentieth Century, of which there has been a steady increase in exports. Cotton is grown, largely by the smaller farms, and the price has been maintained at remunerative levels, according to the Industrial Department of the Canadian National Railways. Interest in the mining of gold, for which the Incas were famous, is occupying a paramount position in the affairs of Peru, the high price for the yellow metal causing a reaction towards development of the mines of that country.

Soviet Printing New Books

Works Of Foreign Authors Will Soon Be Available

The works of a number of American and other foreign authors will become available in large quantities to the Soviet reader this year for the first time since the 1917 revolution.

Plans of the State Publishing House in 1935 provide for 24,000,000 sheets (each sheet containing sixteen pages) of translations of foreign works into Russian. This will be five times the amount of foreign literature printed in Moscow during 1934.

Preference, of course, will be given to authors whose works are written from the Marxist viewpoint or who depict the weakness and foibles of the capitalist system. However, the 1935 plan provides for translations of a few authors, such as Jack London and Ernest Hemingway, whose writings do not fit into these categories.

By Any Other Name

"La Carioca" has had a large part of Madrid's population in its grip—but it wasn't the dance. Each year influenza is given a different nickname, and this year it is "La Carioca." Among the victims was President Niceto Alcala Zamora.

World War tanks went into action in pairs, known as "male and female." The former carried light field guns and led their mates bearing machine guns into the encounter.

Tribute To Shakespeare

Rt. Hon. Arthur Meighen Tells The Story Of The Greatest Englishman In History

"Countries he never saw, nations that were still unborn and continents then unknown to-day pay honor to William Shakespeare, the intellectual monarch of his era, the king of England's kings," Rt. Hon. Arthur Meighen, government leader in the senate, said in an address at Montreal.

Senator Meighen told a large audience the story of "the greatest Englishman of history." His address was heard across Canada. Recalling that the 300th anniversary of Shakespeare's birth was celebrated in Montreal 71 years ago, Senator Meighen quoted part of a speech made then by D'Arcy McGee—"I come as a debtor to acknowledge his accounts to a creditor. I come as a pupil to pay homage to his master, and as a poor relation to acknowledge and to take part in celebrating the birthday of the founder of his house."

In such a spirit did all students approach the task of reading Shakespeare continued Senator Meighen. For 50 years he had read the poet as a devotee and it was as an ardent lover rather than as an expert critic he spoke of Shakespeare.

The poet was one who "poured out most deeply and generously for succeeding generations the rare wine of life." In this age of superfluities and sports, despite all the accumulation of inventions and science, good literature was still the most profitable occupation of one's leisure.

There were imperfections in the poet's work but "three things are only spots on the sun, merely incident to the glorious freedom with which he traverses the world of fact and fancy, singing through his work with that joyous strength which was so characteristic of much of it.

"I know of no doctrine that he ever preached. No man ever was freer of theory or doctrine. He dealt with human life as it was. This he did with an understanding so illuminating that it passed the frontiers of all time. Right and wrong, good and bad, he dealt with, and he showed that good was to be loved and bad to be avoided and deplored."

Antiques Are Forged

Many Exquisite Things Bring Big Prices In Europe

Forged antiques of exquisite workmanship are now fetching huge prices in the art markets of London and Continental capitals. Some of these spurious productions cost $5,000 to manufacture. To combat this traffic the British Museum, jealous guardian of ancient treasure, is strengthening the resources of its Research Laboratory, the keeper of which, Dr. Alexander Scott, F.R.S., is the art forger's most implacable enemy. In future micro-chemistry, ultra-violet rays, and infra-red photography will all play integral parts in the examination of suspects. Stiffness of the legs alone suggested, to the naked eye, something funny in the figure of an eighteenth-dynasty Egyptian god, which recently came up for examination. But when subject to the searching light of ultra-violet rays, the god was seen with the legs of another image cleverly grafted on to its body, while its cheeks and left forearm also bore witness to a forger's plastic surgery.

Should Have Extra Care

Gentle Methods Needed In Training Left-Handed Child

Teachers in more than a thousand London County Council schools are being asked to use the most gentle methods in their handling of the left-handed child.

A memorandum sent to all schools emphasizes the danger of using punishment or ridicule to make a child who is naturally left-handed write with his right hand. Careful study of the left-handed problem has shown that nervous disorders, including stammering were often caused by this form of treatment, it is pointed out.

In early childhood the left-handed child has a great power of developing the use of both hands, and by proper training can be taught to employ them equally well.

All school teachers therefore, are asked to use gentle persuasion to help the left-handed child develop "two right hands."

Phosphorescent Pond

Characterized as one of the strangest phenomena in 80 years, a phosphorescent pond on the island of Maui, one of the Hawaiian group, is attracting curious visitors from all parts of the island. Scientists believe decaying animal matter produces the strange spectacle.

NOW SORE THROAT EASED IN LESS THAN 3 MINUTES!

Rawness, Irritation Go at Once Note Directions for New Instant Treatment

1. Crush and stir 3 Aspirin tablets in a third of a glass of water.

2. Gargle thoroughly—throw head way back, allowing a little to trickle down throat. Repeat—do not rinse mouth.

3. If you have signs of a head or chest cold take 2 Aspirin tablets—drink a full glass of water. Repeat in 2 hours.

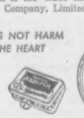

Incredible as it may seem, doctors are now prescribing a way that relieves raw, painful sore throat in as little as 2 to 3 minutes!

All you do is crush and stir 3 *Aspirin* tablets in ½ glass of water and gargle with it twice.

Aspirin tablets disintegrate so *completely* no irritating particles are left. Results are immediate. At once soreness is eased—discomfort allayed.

Everywhere throat specialists urge this *fundamental treatment* instead of less effective old-time "washes" and "antiseptics." Remember this. And when you buy, see that you *get* ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer on every *Aspirin* tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

A Pipeless Organ

Electricity Produces Tones In New Needless Instrument

A "pipeless pipe organ" that draws its music from automobile headlight beams has made its debut in Philadelphia. Its tones are produced by electricity alone, with no pipes, reeds, strings, record or sound film arrangement.

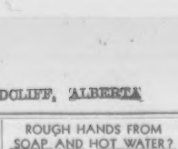

It is smaller than most pianos, can be moved about at will, and "plugs in" at any electric light socket just like a radio or an electric refrigerator.

The instrument, developed with the aid of Leopold Stokowski, conductor of the Philadelphia Orchestra, was introduced by its inventor, Ivan Eremeeff, Russian physicist and co-creator of the helicopter. Nine hundred automobile headlight bulbs, arranged in twelve circular batteries of seventy-five each, throw the beams that create the 1,500 tones the electronic organ can produce.

The beams are turned on by the touch of the keys, arranged in standard keyboard style. In front of the headlight bulbs, twelve slotted metal disks whirl continuously. Through these disks, the beams converge on twelve "electric eyes"—electromagnetic cells—which translate the light to sound and throw the sound through amplifiers.

The tones are built up by mathematical formulae in terms of light values, with the various stops blending with a "fundamental." Each stop has a rheostat to heighten or lower intensity and thus obtain different effects. Two foot pedals give volume and tremolo control.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT (Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: Have you taken advantage of the author's offer to read your handwriting? It is an opportunity to know yourself better, and it may put you on the path to greater things. Read the offer following this article.)

It is not surprising that many of the letters I receive from readers of my articles ask whether there is any indication of talent. It is natural that people should be vitally interested in finding the best line of endeavour to follow, and any information that helps them to get the best out of their capitalization and make the utmost use of their latent possibilities is always welcome.

Handwriting does indicate talent, and this is not to be wondered at when we realize that handwriting is from the brain, and the brain is the source of individual power and capacity.

But the mere possession of a talent is by no means everything. We all have talent for an art talented in particular way, but who do not reach any heights of progress, who, in fact, are drifting along without ever doing anything really worth-while.

One case in particular comes to my mind of a man who has a rare talent for drawing. He can things with a pen and pencil that I have rarely seen equalled by a person without any training along that line. Unfortunately, he happens to be blessed with more than enough of this world's goods, and is in a position where he does not have to work very hard for his living.

The result is that he has never gone to any trouble to bring out the best that is in him, and the world has lost a first-class artist.

This case will illustrate my meaning very aptly. I repeat that the mere possession of a talent does not imply that the talent will be used. There are certain essential characteristics that must be used in order that the talent can be brought into fruition.

The most important of these are Determination, Persistence and Will-power.

Many of my correspondents reveal talent potentialities, but they lack one or more of these other traits that are so vital to progress in anything that you take up.

There are a lot of people who have made real successes of themselves, without any training at all or hardly any, because they have had the will and determination to get somewhere. They have been willing to make any sacrifices in order that they might gain success.

And conversely, as I have shown, there are others with the really vital spark of inspiration lying within them who have failed because of an inability to drive themselves on.

Versatility is a good thing to have, but specialization more often leads to success. Make up your mind to follow a single line, and drive yourself forward with everything that you have along that single path.

Too many irons in the fire often means that none of them are properly attended to, and the result is failure.

Miss J. C., Regina.—You are so versatile that it ceases to be an advantage, and becomes a positive menace to you. You can do so many things fairly well that the trouble is to find one thing to specialize on. But you must do this, if you really want to get anywhere. Take up your singing, and put your whole heart and soul into it. Obtain proper training, and make up your mind that you are going to succeed as a singer. That is the only way.

* * *

A handwriting analysis may open the door of opportunity to you. Find out what your writing shows, as well as that of your friends. Send specimens of the writing you wish to be analysed, stating birthdate in each case. Enclose 10c coin for each specimen, and send with it a stamped addressed envelope to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. All letters are confidential, and replies will be forwarded as quickly as possible. Some delay is unavoidable owing to the large number of letters coming in.

MECCA OINTMENT

Tribute From Chicago

Daily Paper Gives Unstinted Praise To Winnipeg Figure Skaters

National pride was not hurt at the Daily News ice carnival when Canadian champions ran one-two in all the diamond-trophy events for men. No one minded there transient, conquests, for spectators early had lost their hearts to an invading detachment of fourteen young men and young women from the Winnipeg Winter Club.

Singly, in pairs, in fours, in eights, their artistry, held enthralled one of the greatest groups of spectators ever assembled indoors. It was the most beautiful exhibition of figure skating Chicago has ever seen, and it won tributes which stadium crowds had reserved for presidential nominations.

Chicago long has liked and admired the homeland of these attractive invaders. Their triumph—and the graciousness with which they consented to skate in this benefit for poor children of the city—notably strengthen our ties of affection and respect for Canada and Canadians. — Chicago Daily News.

Another Record Claimed

Man Keeps Motorcycle Engine Running For Eight Days

For 5,836 miles a motorcycle, with sidecar attached, travelled along ordinary roads in Australia without a moment's stoppage of the engine, and a world record is thus claimed by the man who rode the combination most of the time, Victor Barclay. He was relieved at intervals by two others but the engine was never allowed to stop at the change-overs. The ride took a little over eight days, the speed averaged being 30 m.p.h. The engine finally stopped owing to a defective plug.

WORLD HAPPENINGS BRIEFLY TOLD

T. W. Grieve of Montreal was elected president of the Canadian Produce Association at its annual meeting in Toronto in conjunction with the 23rd annual convention.

Rear-Admiral Richard E. Byrd, who arrived at Dunedin, N.Z., with his second Antarctic expedition, disclosed the expedition is $50,000 in debt.

Toronto Centre presbytery of the United Church of Canada voted 51-20 in favor of ordination of women as ministers. The decision will be passed on to the general council of the United Church.

Steps to organize a Canadian coal committee with a view to encouraging wider markets and greater consumption of this Alberta product were taken at a meeting of representatives of boards of trade and other organizations in the province.

Official sources charged that reports of a famine in Soviet Russia were part of a deliberate campaign by enemies of the Soviet union and cited recent figures to show the wheat crop last year was larger than that of 1933.

Canada's revenues for present fiscal year are running $31,000,000 and $32,000,000 ahead of last year. The Dominion's revenues are figured every day. They include customs, excise and income tax receipts, post office revenues, tax on gold and several minor sources.

Dr. H. A. Bruce, lieutenant-governor of Ontario, urged Toronto city council to start immediately on a slum clearance program. Dr. Bruce stated Canada was lagging behind the rest of the world in state-assisted housing and it was up to Toronto to give leadership to the rest of the Dominion.

Advertise what you will do and then make doubly sure that you do what you advertise to do. That is what makes the fullest success of advertising.

Figures show that fewer errors are made in night baseball than when the pastime is played in the day.

Little Journeys In Science

MATCHES

(By Gordon H. Guest, M.A.)

Perhaps the greatest discovery ever made by man was that of fire; and one of the most useful, if not the greatest, of inventions was that of producing fire by the use of matches. Friction matches containing the element phosphorus were first introduced by an Englishman, John Walker, about 1826. At the present time there are two general types of match in common use, namely the "strike-anywhere" and the "safety" match. The "strike-anywhere" variety is undoubtedly used the most and contains in the tip the following substances; potassium chlorate which is rich in oxygen; parafin or sulphur; a binding material such as glue; a filling material such as ground glass, and a compound of phosphorus and sulphur known by chemists as phosphorus sesquisulphide. When the ordinary match is rubbed against a rough surface, enough heat is produced by friction to ignite the phosphorus. The heat produced by the burning of the phosphorus is increased by the burning of the potassium chlorate and carried to the wood by the slowly burning parafin or sulphur. Other substances such as starch, clay, or plaster of Paris are often added to the match head to keep it dry or to regulate the speed of combustion.

In the "safety" match, red phosphorus, some substance which gives off oxygen readily, such as potassium chlorate, and some gritty material, such as powdered glass, are mixed with glue and placed on the side of the match box. The tip of this type of match contains potassium chlorate and an easily combustible substance, usually a compound of antimony and sulphur known to the scientist as antimony sulphide. The match cannot easily be ignited by friction except on the prepared surface on the box.

It is the opinion of the various agricultural authorities in Canada that the present coarse grain situation in the Dominion appears to indicate that Canadian farmers generally would be well advised to sow a full acreage of oats in 1935.

European scientists declare that rain falling in wooded land is 25 per cent. greater than that in open areas.

Nearly 3,500 miles of canal are in use in England.

ALL FOOD MADE HER ILL

Caused By Acidity—Corrected by Kruschen

"It is only fair to pass these facts on," writes a nurse. "I was suffering from over-acidity and flatulence to such an extent that I was completely ill. I couldn't take food. When I actually forced myself to take something, I would be wretchedly ill. I have now taken Kruschen for 12 months, and I have no doubt that it has prolonged my digestive system. I am now quite fit and able to work with vigor again."—Nurse E. S.

Indigestion is caused by a failure in the flow of the gastric or digestive juices. As a result, your food, instead of being assimilated by your system, simply collects and ferments inside you, producing harmful acid poisons. The immediate effect of the six mineral salts in Kruschen is to promote the healthy flow of the vital juices of the body. As you continue with the "little daily dose," it ensures the regular and complete elimination of all waste matter every day. And that means a complete end to indigestion.

Recipes For This Week

(By Betty Barclay)

ENGLISH YUMS

1¾ cup sugar
1 cup evaporated milk
¼ teaspoon cream of tartar
½ cup oleomargarine
½ pound pecans, chopped

Combine sugar, evaporated milk and cream of tartar. Cook, stirring constantly, until the soft-ball stage (reached 238 degrees F.). Add oleomargarine and cook until the mixture again comes to the soft-ball stage (238 degrees F.). Add nuts and beat until the mixture becomes full—pour into a shallow pan which has been spread with oleomargarine. Allow to set and cut into inch squares. Makes 30 1-inch piece.

STUFFED HAM ROLL

Sliced of ham ½-inch thick, cut from centre of ham
2 cups moistened bread crumbs
1 tablespoon minced parsley
1 cup tomato juice

Spread bread crumbs over ham; sprinkle parsley over it. Roll up and tie. Pour over tomato juice, adding a little hot water. Place in baking pan, basting occasionally during the two hours usually required for the baking process.

Open To Canadians

New York Magazine Is Conducting Another Literary Contest

Any Canadian novelist who has not published a novel in book form is eligible for an attempt along with his cousinly colleagues to the south at winning $10,000 offered by a New York magazine and publishing house.

This is the fourth competition of its sort, the first of which was won by Martha Ostenso of Winnipeg with "Wild Geese".

All manuscripts must be 50,000 words and must be in before Oct. 15, 1935.

GARDENING

Gordon L. Smith

Spring is once more approaching and with it the desire in the normal human being to start something growing. Soon all signs of winter will have disappeared and the earth gradually changes from its drab coat of brown to something green and warm. But before this change, the would-be gardener commences the annual preparations. Plans are drawn up, seed catalogues perused, and equipment is checked over. Much interest is added to gardening by proper planning and much practical work is done. Like a great picture or a humble barn or garage, the finished result will largely depend upon the thought which precedes actual construction.

Width Vegetable Rows

Practically all vegetables should be grown in absolutely straight lines. Even radishes, lettuce, radish and carrots can go in rows from eight to twelve inches apart, while potatoes, peas and beans will need fifteen to eighteen inches and corn and tomatoes, sprawling cucumbers and squash from 3 to 24. To save space, rows of early and small stuff such as lettuce and spinach can be planted between the taller beets. Where this close planting is followed, it will be necessary to cultivate and fertilize frequently.

Flower Plans

In planning the flower garden, time of blooming is important because some things must be started from seed indoors or in a hot bed. Certain flowers will stand a light frost and some will not. To have flowers from early summer until autumn, time of blooming must be taken into consideration, and heights should be noted down to prevent the tiny things from being hidden by such tall growers as Cosmos, African Marigolds and Stocks. Colors are important. Occasionally two shades do not go well together. Fragrance should be taken into consideration. Flowers like the sweet scented Evening Stock, while not particularly beautiful, have such a delightful odor, particularly in the early evening, that some of them should be included. Then again, flowers have individual preferences. Some like partial shade. Among these are tuberous rooted Begonias and annual Larkspurs, while the bright Nasturtiums, Portulaca and California Poppy revel in full sun and a dry location. With flowers, shrubs, roses, lawns and all forms of decorative gardening, informal planting is advised. Straight lines should be avoided and those already in existence, like house foundations and fences should be screened. Clumps of shrubbery and a few trees about a house will not only break these harsh lines, but will tend to tie the structure down to earth and produce a complete picture.

Friend—"I suppose you have your share of doubtful bills on your books?"

Merchant—"I only wish they were. There's no question about most of them."

Boss—My wife found out that I took you to dinner the other evening.

Secretary—Well, what does that make me?

Boss—My ex-secretary.

New Sun Reflector

Very Simple Device Has Been Invented In Germany

A simple device, consisting of a thin sheet of highly polished metal cut somewhat in the shape of a kidney, is a German invention designed to bring sunshine into every home. The reflector is especially useful for directing the health-giving rays of the sun to the face. It also can be used in treating other parts of the body where solar heat brings beneficial results. The polished sheet of metal is corrugated in such a way that its many flute-like ridges act as multiple reflectors which intensify the heat of the sun's rays.

The age of man has been placed at 16,000,000 years, by a new comparison of blood serums of mankind and ape.

SHORTHAND By Mail

Positively successful by use of Shaw's Improved Home Study Course at low cost to earnest workers.

Write Shaw Schools, Dept. T-T, Bay-Charles Bldg., Toronto, Canada.

Doctors advise this *natural* corrective for Constipation!

Not a drug . . . safe, effective, economical!

Stop sour stomach, bad breath, headaches and all constipation ills. You can do it easily, cheaply with Quaker Bran.

Quaker Bran, the coating of the wheat, is milled so soft it cannot irritate. Yet it is effective. It works with nature to produce normal, healthy bowel movement . . . persuading the intestinal muscles to *normal* activity.

Remember, Quaker Bran is different from all *prepared* bran cereals. It is pure bran, uncooked—unbleached—unadulterated. For these reasons it is definitely richer in mineral and vitamin content.

Serve it with your regular cereal each morning or in muffins, cookies, etc. There is a recipe book in every package.

QUAKER BRAN

Pure, *Natural*, packaged bran. 2810

Are You a COLDS-SUSCEPTIBLE?

Do You CATCH COLD Easily?

At the first warning sneeze, stuffiness or nasal irritation, quick!—applyVicksVa-tro-nol—just a few drops up each nostril. Its timely use helps to *prevent* many colds, and to throw off colds in their early stages.

Do Your Colds Hang On AND ON?

Don't take chances with half-way measures. Rub on Vicks VapoRub—standby of two generations for relieving colds. Its direct double action—by stimulation and inhalation—helps to *end* a cold sooner.

WELCOME NEWS FOR COLDS-SUSCEPTIBLES!

These twin aids to *fewer and shorter* colds give you the basic medication of Vicks Plan for Better *Control* of Colds. You'll find full details of this unique, clinically tested Plan in each Vicks package.

VICKS PLAN FOR BETTER CONTROL OF COLDS

GREASY POTS AND PANS NEARLY DROVE ME WILD UNTIL I USED

It lifts grease right off without scrubbing

Just use a solution of 1 teaspoonful of Gillett's Pure Flake Lye in a quart of *cold** water. Instantly the grease dissolves—without scouring! Use Gillett's Lye whenever you want an effective household cleanser. Frees clogged drains, cleans toilet bowls. Kills germs, and destroys odors. Order a tin from your grocer!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—Send for the free Gillett's Lye Booklet. It tells how this powerful cleanser and disinfectant shortens dozens of cleaning tasks. Also gives full directions for soapmaking, thorough cleansing and other uses on the farm. Address: Standard Brands Limited, Fraser Ave., & Liberty St., Toronto, Ontario.

GILLETT'S LYE EATS DIRT

THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospectors till now returns to tell Dustin and Spike Goddard, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore.

Dustin unexpectedly comes along while Stone and Edith are riding fence, and seeing them, stops and talks to Edith. He mentions their dispute could be settled by marrying him, and Edith refuses the proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Stone tells Crewe, his foreman, about his meeting with Dustin. Stone and Crewe go to Reno to send a telegram to Gerald Keene. While at Reno an attempt is made to kill Stone, who proves more than a match for his enemies.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Carr's cattle. He sets out with Dad Kane to learn the location of his gold discovery. Dad Kane shows Dustin the mine.

They go back to camp, and Dustin shoots Kane. He fixes the shooting on Peyotl Gregg, a drug addict, who, stupefied by the narcotic he had taken, did not know whether he was guilty or not. They bury Kane and then return to the Broken Spur ranch.

Meanwhile at the Hour Glass, Carr, Crewe and Stone speculate as to the meaning of entries in the notebook belonging to Dane Kane that Stone had found. Stone thinks of a possible solution, and, accompanied by Edith Carr, rides out to Red Water to test out his theory, which proves correct, and they find the rich gold deposit mentioned in the prospector's notebook. As they return to the ranch, they meet Dustin leaving the house, who purposely, but unsuccessfully tries to ride down Stone.

(Now Go On With The Story)

CHAPTER XII.—Continued

"It's peyotl," he said sharply. "I know the damned stuff. Peyotl is the old Aztec name. All I know of it is that it is one hell of a kind of dope. After a little while it crazes the user . . . distorts his ideas of right and wrong, you know. If you found those half-smoked stubs by the camp fire, it's pretty clear that whoever was there was usin' peyotl cigarettes. It's against the law, of course."

"Do you happen to know whether old man Kane uses the stuff?"

"I'm damned sure he does not," said Jameson. "He gets bung-full on red-eye when he comes to town and he gets the Indians to make tizwin for him sometimes, but I'm sure he doesn't dope."

"Think Dustin uses it?"

"Not for a minute. Hardly any one uses it now. The Indians used to use it because they like to get all hopped up and it was too risky sellin' whiskey to Indians. A federal offense, you know. It crazes 'em. I only know one fool about here who ever uses the stuff and that's Gregg out at the Broken Spur. They call him 'Peyotl' Gregg because of the way he gets full on it. He's a half-wit who's been workin' on the Broken Spur ever since Dustin and Goddard got it."

"Humph! If you're right. . . . then this man Gregg must have been at that camp in the hills. If Kane was there then this man Gregg may-be can tell us were we can find him. Tell me this, Jameson What's the minin' law? Can a man, who locates an ore-vein, follow that vein when it leads into and under another man's land?"

"I'm pretty sure he can," said Jameson after a moment's thought. "That is he can follow a vein that he finds off a man's land. He can't go on a man's land, pick up a vein and follow that. It's got to be done fairly. . . . Find a vein on his own land; trace it under some one else and follow it there unless the land owner beats him to it. See? Why?"

"Well, it sizes up this way to me. . . . Dustin and Kane have found ore on the Hour-glass. Carr doesn't know about it. Dustin has bought up a note that Carr gave Pegrum, and Dustin will use that note to try to make Edith marry him to save her father. That note gives Dustin half ownership in the Hour-glass and will make Gerald Keene, who owns the other half of the Hour-glass, a partner of Sam Dustin and, if Dustin's plans work out, he will marry Edith Carr.

"Just what do you want?" demanded Jameson curtly.

"First of all I want to find old man Kane. He's the key to the puzzle. He's got to tell us just what kind of a deal he's made with Dustin. He can tell us where and how he found that ore. And if it's on the Hour-glass, whether Dustin knew it was on the Hour-glass when it was located. He may be able to tell us if this man Dustin uses peyotl. If he does, he's probably not responsible for his actions."

"You're barkin' at a knot," said Jameson forcibly. "Sam Dustin is always responsible for his actions. Look here, Stone! What stake have you got in this. You're playin' too close to your lap for me. Come clean, old man."

"You know how the Hour-glass is owned, don't you?" asked Stone suddenly.

Jameson did not know and said so.

"Joe Carr owns one half of it. Gerald Keene, the nephew of old Peter Vinton, owns the other half. If one of them dies the survivor gets all."

Jameson stood staring at him for a moment. Then he went to a closet and came back with bottle and glasses.

"You're tryin' to talk like a sane man," he said, "but your words just don't target. You don't know this man Dustin. By Carr's note, Sam Dustin practically owns Carr's half of the Hour-glass ranch. Keene owns the other half. A gold-mine has been found on the Hour-glass. Will Sam Dustin give half of the Hour-glass with its gold mine to a man he never saw? What deal will he make with this Gerald Keene? I'll tell you. In some way or other, in some damned dark, deep way that we couldn't think of, Gerald Keene will lose his share of the Hour-glass and Sam Dustin will own it."

"Talk your age," said Stone laughingly. "This man Dustin, that you all credit with superhuman powers, can't work miracles, I reckon. The main thing for me to do is . . . find this man Kane. He's the key to the whole darned mess."

"You're probably right"—Jameson nodded curtly—"but consider this. . . . In the camp near where that gold-ore was found you found those pieces of peyotl cigarettes. I don't believe anybody about here but that man Gregg ever smokes them. If our guess is right, then Peyotl Gregg was with the man who found or located that ore vein. . . . Probably old man Kane. The fact that Sam Dustin had that package in his coat pocket implicates him, of course. You can always get him under the narcotic law. He can explain it, of courrg. . . . But we don't need that now. Your best bet to find out exactly what has taken place is a . . . question Peyotl Gregg or . . . find Dad Kane . . . And for God's sake tell his man Gerald Keene to watch his step when he gets here."

"What do you mean?" demanded the mystified Stone.

"You half-baked idiot! . . ." Jameson flung himself across the desk. "This man Gerald Keene represents one-half of the Hour-glass. Sam Dustin virtually owns the other half in the note that he holds from Joe Carr. Gold has been found on the Hour-glass and Dustin knows about it. Do you want to see Sam Dustin marry Edith Carr?"

There was no doubt in Duro Stone's answer to that question.

"All right! Then carry out your first plan. . . Find Dad Kane! I'll start a still-hunt for him. In the meantime we might try a hand at Peyotl Gregg if we can find him."

With those words in his ears, Duro Stone took his departure.

CHAPTER XIII.

Spike Goddard watched Dustin ride up to the ranch-house of the Broken Spur and turn his horse over to one of the hands. With one glance at his partner Spike settled a long, fat whisky, went to the office, got out decanter and glasses and sat down to wait. Presently Dustin stormed up the steps, banged into the house and into the office, where Spike sat waiting, at his partner, Spike's very silence condemned him; also it acted on Dustin like salt on an open cut.

"What the hell ails you?" demanded Dustin curtly. "Anything happen to you?"

Spike shook his head. "Nothin' ever happens to me," he said. "I stay home and 'tend to my knittin' and nothin' ever happens to me. If I ever went trailpin' over the valley trailin' some red-headed girl who likes me just as much as a prairie-dog likes a ground-rattler, I might expect somethin' to happen to me but it never does. . . ."

The bottle whizzed past his head and broke in a score of fragments on the wall. He retrieved his glass that had escaped ruin and laughed.

"You go on an' answer your own question. What all happened to you?"

Dustin told him sketchily and Spike listened in evident disbelief. When that disbelief grew too great for words, Dustin turned on him in growing wrath.

"Listen here," he said. "I'm goin' to come clean with you, Spike. Then you'll understand what I'm after."

"I know," said Spike guardedly. "You're after that red-headed girl of Joe Carr's."

"Yes and by God, I'll get her, too. I went over to the Hour-glass to put it up to her, but she was out ridin' with that damned drug-store cowboy, wanderin' over the country. Six months from now she'll be my wife and she'll have her own kitchen to tend to. She'll be stayin' home then. . . ."

"Looks like that ambition ought to keep any red-headed woman content," said Mr. Goddard, grinning. "It looks to me like you've got the means to persuade her. Why didn't you tell old man Carr that you've bought up his note to Pegram for eleven thousand dollars and that if Edith don't marry you, they're both headin' for the Poor Farm? You'd have him short if you spring that on him."

(To Be Continued)

Discovered By Accident

Money Made And Saved In Very Simple Ways

In the modern ice-cream barrow the cream is kept frozen by use of "dry" ice—that is solidified carbonic-acid gas. A boy in charge of one of these barrows found that, when he put a piece of this dry ice and put it against the bell of his bicycle, the bell would give a rattling ring. From this it was discovered that frozen carbon dioxide produces notes whenever it touches metal and, as a result, a new method has been found for helping musical instrument makers to attain perfect tuning. A Durban metal worker was asked by a friend to nickel a candlestick. Though this was against the rules of the firm he consented. The regular process was to plunge the article a number of times into an electric bath, a slow and costly process, but as an experiment this man tried a special metal finish. The result was so good and so rapid that he took the idea to his employers and the resultant saving in the factory is $150,000 a year. Tar paving was discovered by a boy who was sent for two gallons of tar to dress a roof and on his way back upset the tar in the road. Later it was found that the stones were firmly bound together, and so came about tar macadam.

A New Occupation

Proprietor Of Belgrade Store Does Sums For Students

"Sums done for three halfpence a time," is the notice that has been put up in the window of a shop situated opposite a school in Zagreb, near Belgrade, Servia. The proprietor does a roaring trade. Every evening students deliver their mathematical homework, and every morning on their way to school they call for it—correct in every detail.

Berlin will be a "seaport" when the elevator now being constructed on the River Oder is ready to do its work of lifting river steamers 120 feet.

Edison Bought Patent

Englishman Was First To Make Carbon Filament Lamp

The remark by a Toronto professor that Edison was not the inventor of electric light may surprise the majority of people, but it is quite true. The first electric lamp was produced by Sir Joseph Swan, who was born at Sunderland, England, in 1828. He was a chemical engineer who first achieved success in improvements in photography. He made a carbon filament lamp as early as 1862, and in 1880 exhibited the first filament vacuum lamp.

Edison was working along the same lines about that time, and he bought the Swan patent. Subsequently the first lamps issued from his factory were described as "Edison" lamps, thus linking the two names together after Edison had improved on the original Swan lamp.—St. Thomas Times-Journal.

Highway Construction

Twelve Mile Stretch Between Keewatin And Manitoba Border To Be Completed

Tender for the construction of the 12-mile stretch of trans-Canada highway between Keewatin and the Manitoba border, has been let to the Assiniboia Construction Company of Kenora, it was learned at the Ontario department of northern development.

Work will be started soon, and from 100 to 200 men will be employed on the project which will require about six to seven months to complete. Figures of construction costs were not available.

A purple-topped yellow-fleshed turnip which has been grown in Aberdeenshire, Scotland, for the past 100 years has been found by agricultural scientists to be resistant to club-root disease. The origin of this variety of turnip is unknown.

The farm implement trade in the Argentine is controlled principally by Canada and the United States, Canadian-made harvester-threshers, grain drills, riding ploughs, corn cultivators and planters being well established.

Little Helps For This Week

"The beloved of the Lord shall dwell in safety by Him, and the Lord shall cover him all the day long." Deut. 33:12.

Whate'er events betide,
Thy will they all perform;
Safe in Thy breast my head I hide,
Nor fear the coming storm.

I have seemed to see a need of everything God gives me, and want nothing that He denies me. There is no affliction but either in it, or after it, I find that I could not be without it. Whether it be taken from me, or not given me, sooner or later God quiets me in Himself without it. I cast all my concerns on the Lord, and live securely on the care and wisdom of my heavenly Father. If my ways are in a sense hedged up with thorns and grow darker and darker daily, yet I distrust not my God in the least, and live more quietly by faith than I would do if I possessed everything.

SKIN RASHES

Give Place to Velvet Smooth Skins

In almost countless numbers, skin sufferers have had cause to be thankful for D.D.D., the prescription of a highly successful physician, Dr. D. D. Dennis. This liquid prescription, now made and endorsed by Campana's Italian Balm chemists, allays irritation almost at once, and quickly clears up such skin troubles as eczema, hives, acne, ringworm, dandruff, pimples and rashes. Ask your druggist for D.D.D. Prescription. Trial size, 35c. Guaranteed to give instant relief or money refunded.

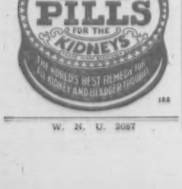

Want Beer Referendum

Taking a referendum at the next provincial general election on the abolition of sale of beer by the glass was urged when a joint delegation from the Alberta Prohibition Association and 14 church denominations interviewed the provincial government. Premier Reid stated in reply that the government would give the request immediate consideration and that the delegation would be advised early of the decision.

Spain is exporting twice as many melons as a year ago.

Backaches

indicate kidney trouble. Gin Pills give prompt and permanent relief as they act directly but gently on the kidneys—soothing, healing and strengthening them. 50c a box at all druggists.

Synopsis of Bylaw No. 179, of the Town of Redcliff

To be voted on by the Proprietary electors of the said Town on the 5th day of April A. D. 1935.

A BY-LAW has been introduced by the council of the Town of Redcliff pursuant to section 68 of the Town and Village Act.

The By-Law provides for the payment to the Mayor and each councillor attending council meetings, of two dollars for each meeting so attended, and for payment to the Mayo. of a sum not more than three dollars per day for each day spent by him in the laying out and inspection of works undertaken by the Town.

No payments to any mayor or any councillor for attending council meetings shall exceed a sum of fifty dollars in any year and no payments to any mayor for time spent in the laying out and inspection of works shall exceed the sum of twenty-five dollars in any year.

The provisions of the By-Law shall come into effect after it is approved by the Proprietary Electors and is finally passed.

NOTICE

I, FRANK BAIRD, of the Town of Redcliff, in the Province of Alberta, Returning Officer hereby certify,

That the foregoing is a true copies of a proposed By-Law which has been introduced and which will be finally passed by the Council of the Town of Redcliff within four weeks after it has been approved by a majority of the proprietory electors voting thereon.

The Vote of the said proprietary electors shall be taken on this by-law on Friday the 5th day of April A. D. 1935 commencing at the hour of 10 o'clock in the forenoon and continuing until the hour of seven o'clock in the afternoon at the Town Hall in the Town of Redcliff.

Dated at the Town of Redcliff in the Province of Alberta this 5th day of March A. D. 1935.

Frank Baird
Returning Officer
